The palette is built using varying shades of blue. The color blue is associated with depth and stability. It symbolizes trust, loyalty, wisdom, confidence, intelligence, faith, and truth.

COMPLIMENTARY COLORS

The secondary palette is constructed using bold shades of red and green. Amongst other associations, the color red is identified with energy, strength, power and determination. Green is the most aesthetically peaceful color for the human eye; it suggests stability and endurance. Finally, the combination of blue, red and green relates very closely to the way humans perceive color with the r-g-b receptors in our retinas.
